

Get YOUR finger  
on the key  
to the future—with  
**ITEC.**

INTRODUCTORY  
BROCHURE

**ITEC.** has all you need to know  
about the new technology

Look inside to discover how this comprehensive course develops

# The micro-millenn

We are living in the age of electronics and computer science – a silent revolution which is changing our way of life. Now is the time to make your move and keep up to date with this extraordinary force of progress.

**ITEC** is for everyone who wants to step into the micro-millennium with real awareness, and play an active part in the exciting era that awaits us!

You owe it to yourself to understand the new technology – how it will affect you, and how it can be used to your advantage.

# mium starts here!

- explained by experts in a way non-specialists will understand
- clear, thorough text with helpful diagrams
- carefully planned to build into a comprehensive course
- develops your knowledge of each subject in easy stages
- covers all major aspects of computers, electronics, and information technology
- complete in just 50 parts plus index

## What is the level of the *ITEC* course?

Part 1 of *ITEC* starts off with the basics but rapidly becomes more complex. The next few parts take you through such areas as: operation of logic gates, binary codes and truth tables • how transistors work as switches and as amplifiers • the structure of semiconductor materials and devices • address, control and data busses • how computer memories are organized and accessed...

Presented in a weekly format, *ITEC* is like having evening classes in your own home. Each part gives you further chapters from the major subject sections, with everything fully explained. It's planned to help your knowledge grow progressively so that, as new ideas are introduced, you understand the principles on which they are based.

## Who is *ITEC* for?

From the young student battling with solid state electronics or computer science, to the enquiring adult who did his learning in the pre-transistor days, *ITEC* fulfils a need for all.

Whether you are a trainee wanting to get ahead, someone who is interested in electronics and computers as a hobby, or you just want to understand the technology that's changing your everyday life — *ITEC* has the facts.

### These are the kinds of questions that *ITEC* will answer:

A **microprocessor** carries out thousands of operations every second. How does it know what to do — and when? Understand the precise operation of the **program counter**, **instruction decoder**, **ALU** and other system components.

**Top-down design** is today's method for writing programs. Why has this become the preferred system, and what does it involve?

**Boolean algebra** is fundamental to the working of every computer. Learn how it is used in the design of **logic circuits**.

**Fibre optics** will revolutionise the telephone exchange of the future, but exactly how does the technology work?

Everyone knows about **Basic** but why do experts use **Fortran**, **Pascal** or other languages?

**TTL**, **CMOS** and **I<sup>2</sup>L** are some of the important building blocks of digital systems. What do the terms mean and how do these circuits operate?

# How to order your binders...

**These binders transform your copies into a handsome encyclopedia set – and give you maximum value from your home study course.**

All you have to do to obtain your binders for I.T.E.C. is to tick the box(es) on the right and fill in your name and address on the section below. Enclose your cheque/postal order (made payable to G.E.J. Publishing Ltd). Fold carefully – following the instructions – to complete the reply paid envelope. **NO STAMP NECESSARY**

If you tick both boxes on the right you will ensure that your future binders for I.T.E.C. arrive regularly, every ten issues. In this way you are saved the trouble of having to remember to order your binders individually and payment is simplified. There is no obligation on your part; you can cancel the standing order at any time.

How the binder set works: there are five binders in the complete set. You simply remove the covers from the weekly parts and store them, ten parts per binder plus the index part in the last binder.

☐ **Please send me my next binder now.**

I enclose cheque/postal order for £3.75 (including postage and packing).

If you require more than one binder to bring your collection up to date, please state how many binders you require and send cheque/postal order to cover the cost at £3.75 per binder.

☐ **I would also like to receive future binders as they are issued.**

I understand I will receive a payment advice for £3.75 (including postage and packing) with each binder, which I will pay only if I am absolutely satisfied with the binder. Otherwise I will return the binder and owe you nothing.

N.B. Please allow 35 days for delivery of your binders.

**IMPORTANT: Please read this carefully:**

**1.** Do not complete this form if you have already asked for binders to be sent to you automatically as they are issued.

**2.** Readers in the Republic of Ireland: please remit your payment in sterling.

**3.** Readers not in UK or The Republic of Ireland, see inside cover for details of how to obtain binders.

Postage will be paid by licensee

Do not affix Postage Stamps if posted in Gt. Britain, Channel Islands or N. Ireland.
